MEMORANDUM FOR ACC/A3

FROM: 613 AOC/CC

SUBJECT: Delivering USPACAF Outcomes with ILZ and MCHMR

1. I am writing to express my endorsement for the MANET Cloud High Mobility Radio (MCHMR) and the Innovation Landing Zone (ILZ). I request your continued funding of this pathfinder to further rapid modernization efforts critical to the Indo-Pacific region. MCHMR demonstrates how targeted investments in the right capabilities can immediately enhance our operational readiness.
2. Our USPACAF Airmen can benefit immediately from the capabilities offered by MCHMR. It enhances our comm and data agility for conducting complex ACE operations. MCHMR has positioned itself as a trusted pathfinder for both CJADC2 with Joint Staff J6 and Department of the Air Force (DAF) Battle Network with ABMS. During Valiant Shield 24, MCHMR successfully addressed critical gaps through a robust, secure commercial and DoD transport solution in Denied, Disrupted, Intermittent, and Limited (DDIL) environments. This technology is not a future possibility—it is a reliable, fight-tonight solution that is operational now and having an outsized impact.
3. I greatly appreciate your leadership and commitment to advancing technologies that benefit the warfighter. The MCHMR initiative provides a crucial edge in maintaining the agility, resilience, and readiness of our forces.
4. As we accelerate modernization to remain ahead of pacing threats, it is imperative that we leverage the fight tonight capabilities available to us today. MCHMR is an essential pathfinder that de-risks long term CJADC2 investment while enhancing our readiness for peer conflict now. I strongly advocate for your immediate support and continued investment in MCHMR. It offers a vital capability that furthers our strategic advantage in the Indo-Pacific theater.

JULIE M. SPOSITO SALCEIES, Col, USAF
Commander

Right Effects ... Right Time!
